

Contractors and their sites

Site works, procurement and logistics, quality, safety, planning, plant — each with its own group, its own dates.

Intelligence supports the decision. People make it.

An illustrative week — not a client's story. What FDI notices in it is one of the pack's real checks.

Without FDI

1. Monday: site works plans Thursday's pour on the second floor.
2. Tuesday: plant reports the concrete pump down until Friday, in the plant group.
3. Thursday 7:00: the trucks arrive; the pump does not.

With FDI

1. Tuesday, the owner sees: a pour counts on plant reported down — the pour notice and the breakdown side by side, each with its message.
2. One request to site works, with a date; the pour moves, or a pump is hired, and the answer says which.
3. Thursday is a working day, not a lost one.

FDI NOTICES

A pour counts on plant reported down

7 BRAINS VISION CAN WATCH

Are guard rails and toe boards in place along the scaffold platform?
